

CESCO's model AA8UVCESCO Direct Gas-Fired Heated Air make-Up Units are specially designed to work with our Main Booth Control Panel to provide fully integrated control and monitoring of the booth system's ventilation requirements. Other models also available.

## FEATURES:

- ANSI Direct-Fired Gas Heater
- Self-contained package includes casing, burner, fan, fan motor and drives, mixing chamber, dampers and controls.
- Painted structural steel frame and watertight steel casing with hinged access doors.
- Burner has stainless steel mixing plates and cast-iron manifold, spark ignition pilot and flame detector.
- Replaceable 1" aluminum filters and clogged filter warning indicator at the panel.
- Fan Motor is EPACT compliant.

The **Heated Air Make-Up** is housed in a self-contained unit with latching hinged panel access to all filters, system components, and electrical controls.

The **Main Booth Control Panel** provided with the booth system integrates booth system functions with touch screen control and monitoring of the Air Make-up unit. Includes start / stop functions and alerts the operator to any fault conditions.
