

40,000 PSI Dual Mode Tumblebox

P/N 150-010

CESCO's AquaMiser P/N 150-010 Tumble Box is the only link you need between your pump and your gun to allow UHP water dumping or multi-gun operation. Designed for blasting from 20,000 to 44,000 psi, this revolutionary 2-valve system provides quick and efficient operation to protect the blast pump from over-pressurization and the blast gun from accidental activation, which could potentially cause injury to personnel. It is constructed to withstand harsh waterblasting environments yet is easy to operate and maintain. Repairs take only minutes. The high quality air system includes an air pressure regulator and oiler to clean and oil the air supplied to the gun, increasing air motor life. The efficient, high quality 3-way pilot valve works with air systems at 90 psi @ 30 cfm.

FEATURES:

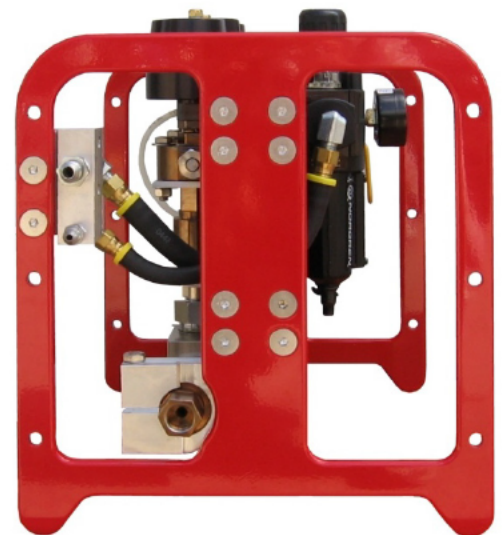

- Easy to operate. Easy to maintain.
- 2-Valve design for easy, cost-effective repairs.
- Complete rebuild takes less than 15 minutes.
- Rugged construction for harsh conditions.
- Aluminum crash frame painted red for safety.
- Quality American construction.
- High quality efficient 3-way pilot air valve.
- High quality air filter, regulator and lubricator.
- Dump tube allows dumping UHP water.
- Metering valve allows multi-gun operation.

Dual Valve Tumblebox

SPECIFICATIONS:

| Description | Multi-Mode Tumblebox |
|----------------|--|
| Rated Pressure | 45,000 PSI |
| Flow Capacity | Up to 6.5 gallons (22 liters) per minute |
| Air Actuator | Pilot valve |
| Air Pressure | 90 PSI @ 30 CFM for 40K PSI operation |
| Air Inlet | 1/2 inch CP fitting |
| Air Ports | #4 JIC for Pilot line. #6 JIC for air motor. |
| Fluid Inlet | 3/8 HP. Adapters available. |
| Compatibility | All common pumps and guns |
| Weight | Approx. 43 Lbs |
