

Aqua Miser **AQUA CAB-III**

Designed with the high production user in mind – Speed and Performance

The Aqua Miser **AQUA CAB** family of Water Blast and Containment Cabinets are an integral part of automated waterjetting systems designed for the de-painting and cleaning of items using high pressure water blasting. Designed to work with an Aqua-Miser water blaster, the Aqua Cab system easily removes coatings and rust and can deburr and clean items to a like new finish. The system is fully adjustable to handle a variety of product sizes and profiles.

The **Aqua Cab-III** model **VR-40K** (shown) is equipped with a vertically mounted blast head and rotating product holder capable of handling single piece loads or multi-piece trays up to 18” wide and 15” high. The cabinet is 12’ Long x 4’-6” Wide x 9’ High. Other cabinet sizes and configurations are available. The integrated system operator interface touch buttons and on-screen dialog boxes allow the user full control of system processes including blast system pressures and speeds.

Customizable

Comprehensive Control Panel with Operator Interface

Totally enclosed for safe and quiet operation

Environmentally sound cleaning and stripping technology

The **AQUA CAB III** may be installed in conjunction with Aqua Miser’s available integrated customizable Water Filtration System that filters the blast waste and recycles the blast water for reuse as part of a closed loop waterjetting system. Both solids and contaminants are filtered and stored for easy removal. All waste is minimized and disposal fees are drastically reduced.
