

Aqua Miser **AQUA CAB**

Dual product trays with feeds at each end

Single feed units also available

Comprehensive Control Panel with Operator Interface

Customizable

Totally enclosed for safe and quiet operation

Designed with the high production user in mind – Speed and Performance

The Aqua Miser **AQUA CAB** is an integral part of an automatic waterjetting system used for cleaning and stripping of small to medium parts. It is fully adjustable to handle a variety of product shapes and sizes. Designed to work with the Aqua Miser E75V water blaster, the Aqua Cab easily removes coatings and rust and can deburr and polish items to a like new finish. The Operator Interface touch buttons and on-screen dialog boxes allow the user full control of the system processes including blast system pressures and speeds.

Environmentally sound cleaning and stripping technology

The Aqua Miser **AQUA CAB** is a closed loop waterjetting system that filters and recycles the blast water for reuse. Both Solids and airborne contaminants are filtered and stored for easy removal. All waste is minimized and disposal fees are drastically reduced.
